

Cost per crop

Whole farm — 1.010 polybags · 2.020 plants · one full crop, transplant to harvest · every input priced, full product names

FEED USED — 1.000 L TANKS BY STAGE

S01 GROW
16,4 L per bag
17 tanks

S02 FLOWER
18,4 L per bag
19 tanks

S03 SIZING
25,6 L per bag
26 tanks

S04 RIPEN
9,6 L per bag
10 tanks

TOTAL FED
70,0 L per bag
72 tanks

70.700 L of feed. Three inputs sit outside the tank — silicon drench (8 weekly, HST 8–60), Trichoderma cup drench (HST 0, 17, 38, 59) and Tri-Pholate foliar (HST 20, 28, 35). From HST 72 the tank is plain water, no cost.

PRODUCT	RATE / KG	KG USED	TOTAL
YaraTera Calcinit calcium nitrate · 15,5% N · 19% Ca	14.800	66,27 kg	980.722
Meroke MAG-S magnesium sulphate · 16% MgO (9,6% Mg) · 32,5% SO ₃ (13% S)	16.000	43,69 kg	698.960
Meroke SOP sulphate of potash · 52% K ₂ O (43% K) · 18% S	25.000	26,25 kg	656.250
YaraTera Krista MKP mono potassium phosphate · 22,7% P · 28,2% K	63.000	15,42 kg	971.460
YaraTera Krista K Plus potassium nitrate · 13,7% N · 38,4% K	46.000	8,05 kg	370.300
Meroke Karate Plus Boroni pupuk kalsium nitrat · 15,5% N · 26% CaO · 0,3% B	13.200	3,60 kg	47.520
MerokeVITAFLEX pupuk mikro majemuk · Fe Mn Zn Cu B Mo · 500 gr	200.000	1,44 kg	288.000
MerokeMIKRO Fe 6% EDDHA-Fe iron chelate · not Fe-EDTA · 500 gr	273.904	360 g	98.605
Kalsika — silicon drench, 8 rounds kalium silikat (K ₂ SiO ₃) · 51,57% SiO ₂ · 26,14% K ₂ O	409.866	800 g	327.893
Tricoderma+ — cup drench, 4 rounds Ruminesia · Trichoderma harzianum + Bacillus, Azotobacter, Pseudomonas	80.485	1,01 kg	81.290
YaraVita Tri-Pholate — foliar, 3 sprays foliar micronutrient · 25 g pack · 3 sprays per crop	1.491.600	24 g	35.798
TOTAL		166,90 kg	Rp 4.556.798

PER POLYBAG
Rp 4.512
1.010 polybags · Rp 2.256 per plant

PER 1.000 L TANK
Rp 57.109
feed only — drenches and foliar excluded · 72 tanks

WITH LABOUR
Rp 5.356.798
adds Rp 800.000 per crop for mixing & fertigation

Silicon. Kalsika, 100 g per 300 L of plain water, own irrigation pulse — eight weekly drenches from HST 8 to HST 60. Never in the feed tank.

Trichoderma. Tricoderma+ (Ruminesia), 1 g per litre, 250 ml poured at the base of each polybag by hand. Four rounds — HST 0, 17, 38 and 59.

Not included. Seed, coir, electricity, water and labour (shown above). Part-used tanks at a stage change may add up to 5%.

What each product is

Page 2 of the cost card — so nobody weighs the wrong bag · analysis shown as oxide and elemental — the same content, two ways

⚠ **Two colour rules.** On the **Yara** sacks, check the fingerprint pattern — CALCINIT red, KRISTA K PLUS green, KRISTA MKP navy blue. On the **Meroke** packs, every one is white with the same red bird, so check the droplet — MAG-S purple, VITAFLEX pink, MIKRO Fe dark maroon. Karate Plus Boroni is the only orange sack.

The three that get confused. Krista MKP and Krista K Plus are both Yara, both white, both say KRISTA — but MKP goes in **Drum B** and K Plus goes in **Drum A**. Never swap them. **Calcinit** and **Karate Plus Boroni** are both calcium nitrate and both go in Drum A, but Boroni also carries boron and is only used at Flower and Sizing. **SOP** and **MAG-S** both come in white 1 kg packs — SOP goes straight into the 1.000 L tank, MAG-S goes in Drum B.

BAG A → DRUM A

YaraTera Calcinit
calcium nitrate · 15,5% N · 19% Ca

RED pattern on the sack. White prills. Pulls water from the air and sets hard — double-bag and seal it.

25 kg sack · Rp 14.800/kg

BAG A → DRUM A

YaraTera Krista K Plus
potassium nitrate · 13,7% N · 38,4% K

GREEN pattern on the sack. White crystalline. Says KRISTA K PLUS.

25 kg sack · Rp 46.000/kg

Not the same as Krista MKP — that one is Drum B.

BAG A → DRUM A

Meroke Karate Plus Boroni
pupuk kalsium nitrat · 15,5% N · 26% CaO · 0,3% B

ORANGE sack, sunburst pattern. The only orange bag in the store. Only used at Flower and Sizing — never Grow or Ripen.

25 kg sack · Rp 13.200/kg

BAG B → DRUM B

YaraTera Krista MKP
mono potassium phosphate · 22,7% P · 28,2% K

NAVY BLUE pattern on the bag. White crystalline. Says KRISTA MKP.

25 kg sack · Rp 63.000/kg

Not the same as Krista K Plus — that one is Drum A.

BAG B → DRUM B

Meroke MAG-S
magnesium sulphate · 16% MgO (9,6% Mg) · 32,5% SO₃ (13% S)

PURPLE droplet. White crystals. The biggest weight in Drum B. One strength only — 1 kg and 25 kg packs are the same formulation.

1 kg packs · Rp 16.000/kg

Not SOP — SOP goes in the tank, not a drum.

BAG B → DRUM B

MerokeVITAFLEX
pupuk mikro majemuk · Fe Mn Zn Cu B Mo · 500 gr

PINK droplet. Only 200 g per drum — use the kitchen scale.

500 gr pack · Rp 200.000/kg

BAG B → DRUM B

MerokeMIKRO Fe 6%
EDDHA-Fe iron chelate · 500 gr

DARK MAROON droplet. Only 50 g per drum — kitchen scale.

500 gr pack · Rp 273.904/kg

Must be EDDHA, not Fe-EDTA. Different product.

STRAIGHT INTO THE TANK

Meroke SOP
sulphate of potash · 52% K₂O (43% K) · 18% S

Purple panel, red bird. Dissolve in warm water first. Never goes in a drum or a bag.

1 kg packs · Rp 25.000/kg

Flower, Sizing and Ripen only — no SOP at Grow.

DRENCH · OWN PULSE

Kalsika
soluble powder kalium silikat (K₂SiO₃) · 51,57% SiO₂ · 26,14% K₂O

BLUE sachet, 100 gram. One sachet in 300 L plain water. Never in Drum A, Drum B or the feed tank.

100 g sachet · Rp 409.866/kg

Never the same day as Tricoderma — leave 2 days.

DRENCH · BY CUP, BY HAND

Tricoderma+ (Ruminesia)
living spores · Trichoderma harzianum + Bacillus, Azotobacter, Pseudomonas

Silver foil, yellow fruit label. 1 g per litre, one cup per bag.

1 kg pack · Rp 80.485/kg

Never in the drippers or the feed tank — it blocks them.

FOLIAR · LEAF SPRAY

YaraVita Tri-Pholate
foliar micronutrient

Small white sachet, GREEN pattern. 0,125 g per litre. Three sprays only — HST 20, 28, 35, always after 4 pm.

25 g pack · Rp 1.491.600/kg

We buy the 25 g pack. The sachet pictured is the 2,5 g size — same product, smaller pack.

Stop after HST 35 — spray marks the net and drops the grade.
